LATEST TRENDS

GROUND FISH

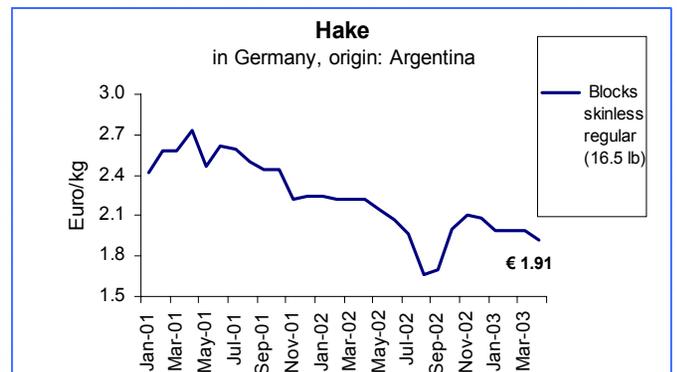

Alaska pollock prices (PBO/FAS) appear to be stabilizing at between US\$2 300 and US\$2 400/MT cfr Europe. According to trade sources, a relatively positive supply situation in Russia is being balanced by more limited US trading as companies there focus on surimi production. The USA was the leading supplier of

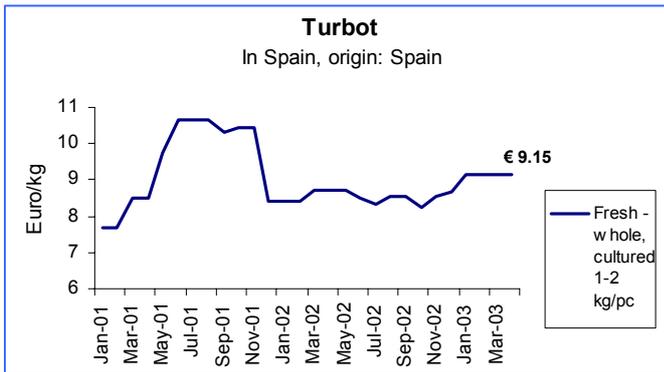

Alaska pollock fillets to both Germany and France in 2002.

With many longer term contracts now agreed for the A season, traders expect prices to remain stable, at least in the short term. There are reports of shortages, however, of double frozen fillets from China and some upward price pressure is reported in this segment. Prices for double frozen fillets have been quoted in the US\$1 800-1 900/MT range (cfr Europe).

Price quotes in April for *Merluccius gayi* **hake** fillet blocks point to an upward price trend during the first 4 months of 2003. This trend is no doubt influenced by the current Peruvian fishing restrictions concerning hake.

FLATFISH

Demand for farmed turbot was lower than expected in March. Several correspondents have referred to the adverse effect of the war in Iraq on the restaurant trade and on the demand for fine fish species in general. Demand and prices for turbot are therefore expected to remain flat throughout April. Farmed turbot prices at the beginning of April are roughly at the same level as those for February and March with, for example, 2–3 kg fish quoted at around €12.45/kg.

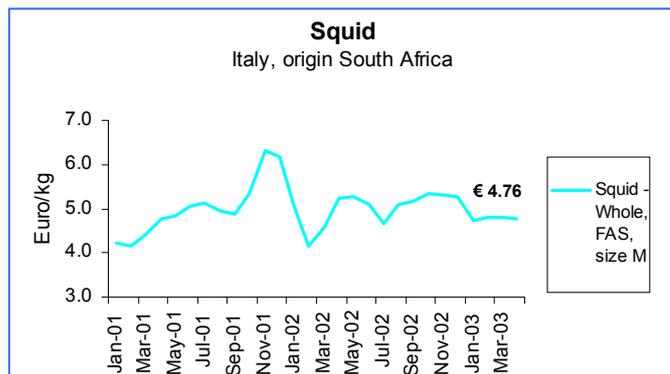

TUNA

Catch levels in the Indian Ocean slowed somewhat during the second half of March. Nevertheless overall landings for the first quarter of 2003 are significantly above those for the same period in 2002. The **yellowfin** share of French vessel catches is reported to be the highest since 1998 while Spanish vessels have caught large volumes of **skipjack**. Indian Ocean canneries appear to be well covered as a result.

On the Atlantic side, trade sources point to the adverse effects of weather and oceanic conditions on supplies notably in relation to the Dakar and Tema

pole and line fleets. In addition, deliveries from the purse seine fleet are reported to be below the requirements of the West African canneries. On the other hand, the European market is well supplied in the round tuna segment with canneries apparently covered at least through May. The decline in the Bangkok reference market, particularly for skipjack, means that price levels continue to experience downward pressure. At the same time, there are reduced supplies of certain products such as South American (zero duty) loins affected by poor landings in Columbia and Ecuador.

CEPHALOPODS

SALMON

Export prices from Norway have been fairly stable over the last few weeks. Sales volumes are very good for the moment with more than 10 000 MT exported several weeks in a row, reaching the 100 000 MT level for this year already a few weeks ago, up almost 7 per cent on last year.

Traditional fresh salmon markets such as Denmark, France and Germany report strong demand whereas Japan and the UK are down from last year.

On the salmon price agreements between Norway and the EU the “jury is still out”, but comments

from Brussels report that a majority of EU trade ministers are expected to approve the European Commission's recommendations in clearing Norway

from the dumping and subsidy accusations. The final verdict, however, is only expected in May.

SHRIMP

Price quotes for farmed white shrimp remain relatively low due to good supply availability and uncertainty concerning future demand levels. FOB prices for Ecuadorian shrimp are at the same level as last month. Initial indications for 2003 in the French market show imports of frozen warmwater shrimps in January up over 40% on January 2002 helped by a fall of 18% in unit values. Brazil, Colombia and Ecuador account for the bulk of the volume increase with Brazil now the leading supplier of shrimp (all categories combined) to the French market.

BIVALVES

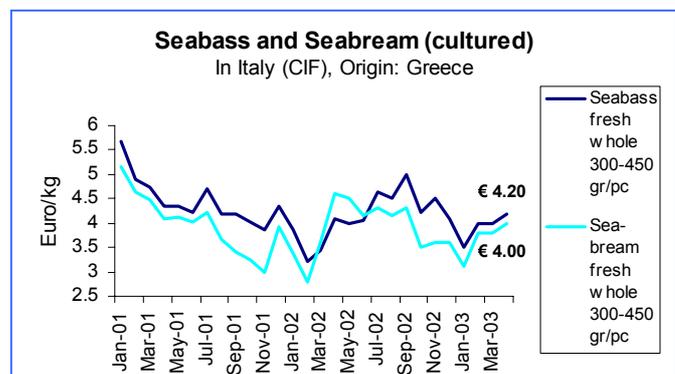

The French **live mussel** season is winding down. The market has been importing Irish ground and rope cultured mussels in recent months although with the onset of spawning, this trade is now coming to an end. Bulk supplies of bottom culture mussels from Ireland are quoted at around €650/MT CIF while rope mussels are making approximately €1 000/MT CIF. Historically, these prices are above

average and reflect the general penury of mussels in northern Europe this season. For the 5 months ending January 2003, France imported (mainly from the Netherlands, Spain and Ireland) a total of 14 800 MT of chilled mussels, 9% below the corresponding period for the previous season. Average unit import values are up 14% on last season.

SEABASS/SEABREAM

Demand for bass and bream is strong in the Italian market but prices are fairly low. A concerted attempt by Greek producers last month to lift prices has had some success, especially for bream, but prices may recede if new volumes come to market from seasonal producers such as Malta.

Demand in Spain is good, especially for the medium sizes, (450-600 gr) and the market continues to be supplied by Greek exporters in addition to the domestic producers. Portugal on the other hand reports good demand for the smaller sizes (250-300gr).
